Traffic survey

Test road

Sun 11 Oct 2026, 17:47 to 17:47 · 1 min of counting

Motor vehicles	Busiest hour	85% drove at or under	Over the 50 km/h limit
2	**2**	**57 km/h**	**50%**
in 1 min	17:00 to 18:00	from 2 speeds measured	1 vehicle

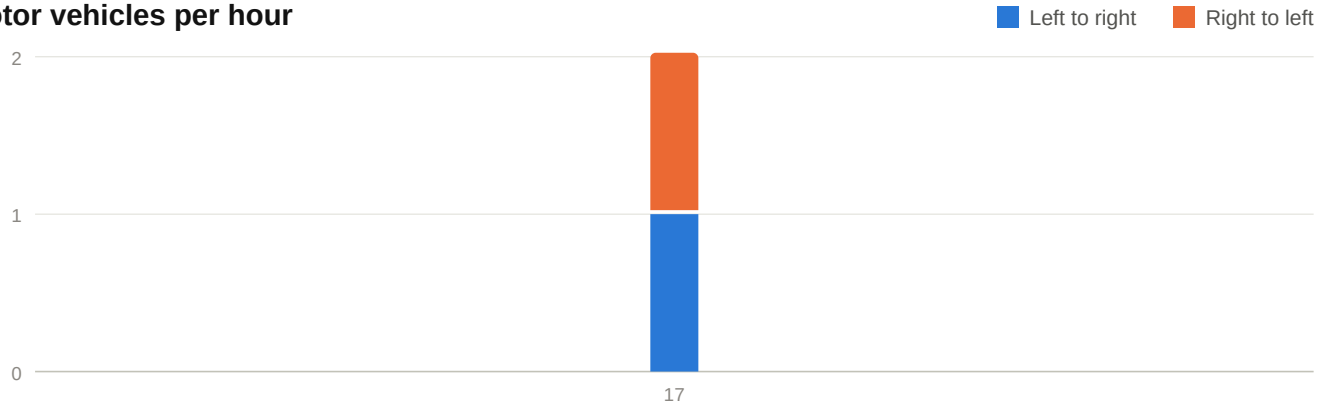
Road users counted

Type	Left to right	Right to left	Total
Cars	1	0	**1**
Vans & trucks	0	1	**1**
All motor vehicles	**1**	**1**	**2**
Long vehicles (7.5 m or more)			2

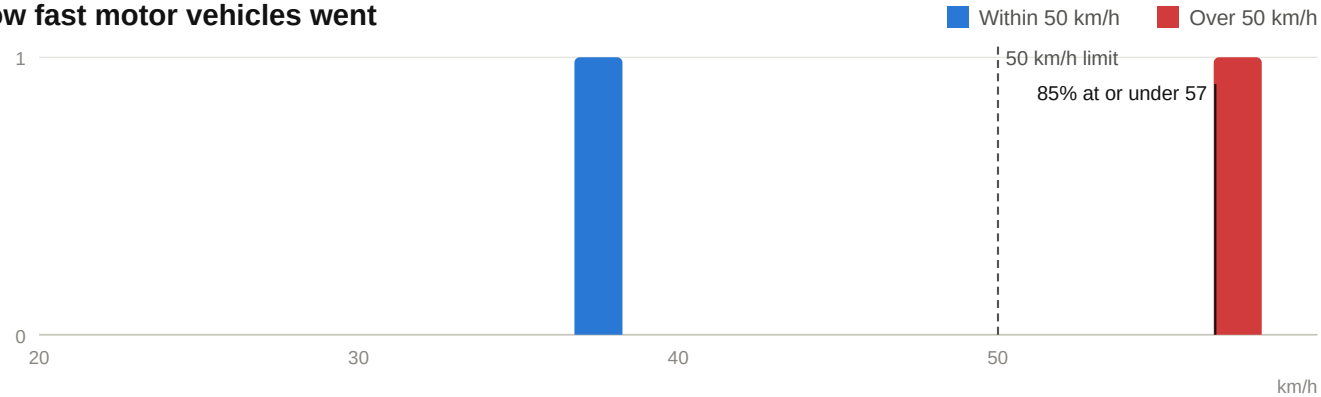
Speeds of motor vehicles (km/h)

	Both ways	Left to right	Right to left
Speeds measured	2	1	1
Average	49.5	39.1	59.9
85th percentile	**56.8**	**39.1**	**59.9**
Fastest	59.9	39.1	59.9
Over 50 km/h	1 (50%)	0 (0%)	1 (100%)
Over 60 km/h	0	0	0

Motor vehicles per hour



How fast motor vehicles went



How this was measured: road users were counted automatically by RoadSight, an app running on a phone camera that analyses the picture on the phone itself. No images, video or number plates were recorded or kept. Each road user is counted once, when it first crosses one of two lines marked across the road; its speed is the 20 m between the lines divided by the time it took, so speeds are estimates that have not been checked against a calibrated speed device, and depend on how accurately that distance was measured. Vans and lorries are counted together; long vehicles are those measured at 7.5 m or more. Vehicles hidden behind others can be missed, so counts are a minimum.
